EDUCATION

University of California, Riverside, Bourns College of Engineering – Riverside, CA **Sept. 2017 – Present**

GPPE Program, Electrical and Computer Engineering

- *Relevant Coursework:* Computer Vision; Computational Learning (Auditing); Data Acquisition, Instrumentation, and Process Control
- *Emphasis:* Machine Learning, Computer Vision

Wuhan University of Technology – Wuhan, China **Sept. 2014 – Jun. 2018**

Bachelor of Science, Automation

- *Ranking:* 1/70; *GPA:* 4.13/5.0
- *Awards & Honors:* National Scholarship (2014) from Ministry of Education of the People's Republic of China; Outstanding Student (2014-2016) from Wuhan University of Technology

PROJECT EXPERIENCE

Autonomous Vehicles & Vehicle to Vehicle Communication – UC Riverside **Aug. 2017 – Dec. 2017**

The aim of this project was to design and to develop autonomous vehicles that can navigate on their own and that enable internal information flow among vehicles.

- Created KPIs, such as project goals and deliver time, for all electronic system design teams
- Processed videos captured by cameras that are mounted on the vehicles with TensorFlow Lite and OpenCV
- Utilized CNN model to train the vehicles to navigate on the sidewalk with pedestrian detection

Sound Synthesizer – UC Riverside **Nov. 2017 – Dec. 2017**

The aim of this project was to build a synthesizer keyboard with an array of touch buttons.

- Generated, collected, and organized ideas for the whole project
- Connected a 12-key capacitive touch sensor to Cola cans and used Arduino to monitor the touch keyboard
- Researched and gathered information on Github, open source libraries, and online references

WeChat Web Platform – Wuhan University of Technology **Feb. 2017 – Jun. 2017**

The aim of this project was to build a web platform for current students to post and to display their projects of this class for future students on WeChat.

- Built a website using HTML, CSS, JavaScript, PHP and managed the database using MySQL
- Designed a home page and functions of the website, and developed a WeChat public account for easier access to our website

Automatic Washing Machine – Wuhan University of Technology **Feb. 2017 – Jun. 2017**

The aim of this project was to build an automatic washing machine fulfilling the function of washing and spinning with controllable time and number of loops.

- Programmed with ladder diagram and sequential function charts to achieve the logic function of PLC
- Designed a UI for HMI, making it functional and aesthetically pleasing

RESEARCH EXPERIENCE

Deep Learning Image Classification – UC Riverside **Aug. 2017 – Dec. 2017**

The aim of this project was to classify images using deep neural networks.

- Implemented and compared several different machine learning algorithms such as KNN, SVM, MLP, CNN and CapsNet with Python on MNIST dataset
- Visualized the whole learning process of the algorithm, including the change of weights and activations over time

TECHNICAL SKILLS & INTERESTS

- *Programming Languages:* Python, C/C++, Javascript, Java, HTML, CSS, Markdown
- *Libraries / Frameworks:* TensorFlow, OpenCV, Keras, Scikit-Learn, Numpy, Pandas, Matplotlib
- *Software:* Jupyter Notebook, PyCharm, Matlab, AutoCAD, Altium Designer, Keil, Cadence, Proteus
- *Interests:* Swimming, Traveling, Photographing, Playing Piano
